

About Philatron International

PRIME MANUFACTURER:

Philatron International is a prime manufacturer of electrical wires, cables, and hoses.

OPERATIONS:

Our operations include copper drawing, roping, cabling, extruding, injection molding, and value added assembly. Some of our operations can be seen by visiting www.PHILATRON.com.

PRODUCTS:

Founded in 1974, Philatron International has grown into the world's foremost specialists of extra flexible stranded bulk power cables and coiled cables, cords, and hoses.

Philatron products include portable power cables & cords, flexible tray & control cables, and coiled cables/cords. Businesses and industries served include consumer, computer, crane, entertainment, heavy duty trucking, military, irrigation, oil, marine, mining, medical, and custom original equipment manufacturers.

Philatron's custom and standard cables meet UL, CSA, MHSA, SAE, and Military regulations where applicable.

PHILOSOPHY:

Philatron sells superior value rather than just cheap prices. It is Philatron's philosophy to serve our customers with the best value for their dollars. This does not mean that our prices will always be cheaper, but it does mean that customers will gain more for their dollars by having cables and hoses that last longer and are more reliable in all environments.

MISSION:

It is Philatron's mission to provide safer, longer lasting, and more durable cables and coiled cables/cords/hoses for world wide usage indoors, outdoors, and under the sea - for normal or harsh environments, normal or extreme weathers, and normal or extreme temperatures.
