

# STALLION

Premium Air Lines

## \$1.61 per month...

***That's the cost of owning the most reliable air lines on the market: STALLION™***

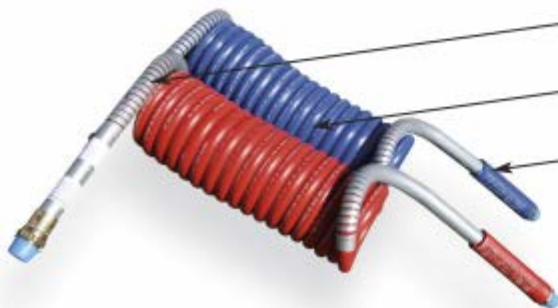

When you do the math, inexpensive, imported offshore air lines are costly. Why? They deliver short duty cycles and require frequent replacement.

While other air lines may appear less expensive at the outset, the cost of some competing air lines is up to 4-times the cost of owning the very best: STALLION™ by Philatron.

What makes STALLION™ outperform every other air line on the market? In addition to its anti-kinking design, STALLION™ air lines are made of a patented compound that delivers a reinforced, dual stage wall that is twice as thick as Nylon air lines. STALLION™ Air Lines perform flawlessly in virtually all operating conditions, from -85F° to +260°F. Nylon air lines do not compare.

So, unless your travels take you to conditions more challenging than the Arctic or more hostile than Death Valley at the peak of summer, you will not need to consider your air lines for quite some time to come.

BRAND	WARRANTY	SERVICE LIFE	COST PER SET	PRICE DIVIDED BY SERVICE LIFE	TRUE COST PER MONTH
Bargain Basement Import	None	3 months	\$19.00	\$19.00/3	\$6.33
